Satyam Awasthi

Researcher & Software Engineer

satyam.aw@yahoo.com — satyam-aw.github.io — satyam-aw — 0000-0002-6095-4303 — LinkedIn

Professional Summary

Computer Science researcher and software engineer specializing in **Autonomous Decision-Making**, **Spatial AI**, and **Cyber-Physical Systems**. Focused on developing deterministic state frameworks and intelligent agent architectures under tight real-world constraints.

Education

University of California, Santa Barbara (UCSB) Santa Barbara, CA
M.S. in Computer Science (GPA: 3.91/4.00) Sep 2021 – Jun 2023
Graduate Research focused on Spatial AI, AR/VR, and HCI at the Four Eyes Lab.
Advisor: Prof. Tobias Höllerer · Co-Advisor: Prof. Michael Beyeler

Indian Institute of Technology, Kharagpur (IIT Kharagpur) Kharagpur, India
B.Tech. in Electrical Engineering, Minor in Computer Science (GPA: 8.98/10.0) Jul 2016 – Jul 2020
Graduated with First Class Honors.

Skills

Programming Languages (Expert): Python, C++, Kotlin, Java, MATLAB
Frameworks & Core Tools (Advanced): Android/iOS Native SDKs, LangChain, Pydantic (JSON Schema), OpenCV, ROS (Robot Operating System), PyTorch
Fields of Interest: Autonomous Decision-Making, Embodied AI, Spatial AI, Multi-Modal Sensor Fusion, Cyber-Physical Systems (CPS)

Publications

Refereed Conference Papers

Snigdha Das, Satyam Awasthi, Abdul Shamnar P, Pradipta De, Sandip Chakraborty, and Bivas Mitra.
SmartWatch for Wall Writing: Real-time Transcription of Wall Writing from Inertial Sensing
Proceedings of the 14th International Conference on COMmunication Systems & NETworkS (COMSNETS), 2022.
DOI: 10.1109/COMSNETS53615.2022.9668531
Created inertial tracking methods to decode architectural hand stroke motions into alphanumeric symbols on wrist-worn wearables.

Refereed Poster Papers

Satyam Awasthi, Vivian Ross, Sydney Lim, Michael Beyeler, and Tobias Höllerer.
Eye Tracking Performance in Mobile Mixed Reality
IEEE Conference on Virtual Reality and 3D User Interfaces Abstracts and Workshops (VRW), 2024.
DOI: 10.1109/VRW62533.2024.00321
Investigated low-latency mobile eye tracking performance profiles across modern mixed reality layouts. Supported by NSF Grant #2211784.

Satyam Awasthi, Vivian Ross, Michael Beyeler, and Tobias Höllerer.
EyeTTS: Evaluating and Calibrating Eye Tracking for Mixed-Reality Locomotion
IEEE International Symposium on Mixed and Augmented Reality Adjunct (ISMAR-Adjunct), 2023.
DOI: 10.1109/ISMAR-Adjunct60411.2023.00104
Proposed unique calibration logic pipelines specifically optimized for eye tracking modalities within mixed-reality locomotion patterns. Supported by NSF Grant #2211784.

Experience

Intuit Inc Mountain View, CA · Mar 2024 – Jan 2026
Software Engineer 2

- Built dual-stage **agentic decision pipelines** using tool-schema routing for real-time intent classification and sequential state tracking.
- Developed a decoupled **generative UI engine** leveraging RAG and structured LLMs to optimize deterministic component layouts.

Yahoo Inc Mountain View, CA · Apr 2023 – Nov 2023
Software Dev Engineer II (IC3)

- Developed **client-side rule engines** for asynchronous receipt payloads, executing deterministic filtering for **real-time decision support**.
- Designed a dynamic, state-driven carousel UI framework optimized for client-side rendering efficiency.

Coupang Global LLC Mountain View, CA · Jun 2022 – Sep 2022
Software Engineering Intern

- Engineered **context-aware heuristics** to prune multi-dimensional search spaces based on active user state vectors.
- Designed **Content-Based Filtering (CBF)** layers using **cosine similarity** to rank high-dimensional product features.

Samsung Research Institute Noida, India · Sep 2020 – Sep 2021
Software Engineer (CL 2)

- Architected a **continuous on-device perception pipeline** ingesting multi-modal media streams for automated ML classification.
- Designed a **cross-profile data brokering engine** leveraging multi-user storage isolation to route assets from **User 1** to sandboxed **User 0**.

Projects

JitterNot Jan 2022 – Mar 2022
LSTM-Based Model Predictive Controller for Adaptive Video Streaming UCSB

- Developed an LSTM network for real-time throughput prediction, transforming the closed-loop control system from MISO to SISO.
- Implemented an MPC controller leveraging Receding Horizon Control (RHC) principles to dynamically calculate optimal video resolution.

Autonomous Ground Vehicle & Swarm Robotics Jan 2016 – Dec 2018
End-to-End Perception, Planning, and Multi-Agent Navigation Stack IIT Kharagpur

- Built an autonomous navigation stack in ROS, fusing heterogeneous sensor streams (LiDAR, IMU, GPS) via an Extended Kalman Filter (EKF).
- Implemented visual obstacle segmentation networks (U-Net) along with global (A^*/Dijkstra) and local (DWA) path planners.
- Researched decentralized swarm coordination using peer-to-peer relative pose estimation (AprilTags) over an ad-hoc XBee mesh network.

In Motion — HAR using DeepConvLSTM Nov 2019 – Nov 2019
Distributed Mobile Computing System for Human Activity Recognition IIT Kharagpur

- Designed a client-server telemetry pipeline streaming high-frequency IMU sensor arrays for rolling window inference.
- Implemented a DeepConvLSTM core architecture using TimeDistributed CNN layers to model spatial-temporal features efficiently.

CohesiveAR Apr 2022 – Jun 2022
Augmented Reality Pipeline for Texture Extraction and Homography Mapping UCSB

- Engineered an asset ingestion pipeline using Google ARCore and OpenCV to project 3D world coordinates into 2D display spaces.
- Implemented perspective warp and homography transformations to rectify camera tilt skew into standardized orthogonal textures.

Tweeter: Distributed Infrastructure Testbed Sep 2021 – Dec 2021
High-Concurrency Microblogging Testbed on AWS EC2 Clusters UCSB

- Conducted high-throughput load testing up to 512 users/sec, mapping user trajectories as state machines to latency scaling curves.

- Optimized read throughput by deploying nested fragment caches and database query preloading to eliminate bottleneck points.

Teaching

University of California, Santa Barbara Santa Barbara, CA
Graduate Teaching Assistant Sep 2021 – Jun 2023

- Directed instructional labs, formulated algorithmic programming assignments, and monitored system architecture milestones for senior capstone teams.
- Covered advanced and core tracks: CS189 (Capstone), CS184 (Android), CS24 (C++ Data Structures), and CS16 (Problem Solving).

Academic Service & Peer Review

Technical Program Committee & Peer Reviewer
ACM Symposium on User Interface Software and Technology (UIST) May 2024
Served as an external peer reviewer evaluating full paper submissions for novel interface hardware, interactive system architectures, and spatial tracking methodologies.
