

# Satyam Awasthi

Researcher & Software Engineer

✉ [satyam.aw@yahoo.com](mailto:satyam.aw@yahoo.com) — [satyam-aw.github.io](https://github.com/satyam-aw) — [satyam-aw](https://www.linkedin.com/in/satyam-aw) — [0000-0002-6095-4303](https://orcid.org/0000-0002-6095-4303) — [in](https://www.linkedin.com/in/satyam-aw) LinkedIn

## Professional Summary

---

Computer Science researcher focused on **Autonomous Systems**, **Spatial Perception**, and **Model-Based and Learning-Based Control**. My research explores how perception, predictive modeling, and planning can be integrated with control frameworks to enable robust long-horizon autonomy in robotic systems operating under uncertainty.

## Research Interests

---

Autonomous Systems, Spatial Perception, Model-Based and Learning-Based Control, and Robot Planning, with emphasis on long-horizon decision-making under uncertainty in real-world robotic environments.

## Education

---

**University of California, Santa Barbara (UCSB)**

*M.S. in Computer Science (GPA: 3.91/4.00)*

Santa Barbara, CA

Sep 2021 – Jun 2023

**Indian Institute of Technology, Kharagpur (IIT Kharagpur)**

*B.Tech. in Electrical Engineering, Minor in Computer Science (GPA: 8.98/10.0)*

Kharagpur, India

Jul 2016 – Jul 2020

## Research Experience

---

**Four Eyes Laboratory, University of California, Santa Barbara**

Sep 2021 – Jun 2023

*Graduate Researcher*

Advisor: [Prof. Tobias Höllerer](#), Co-Advisor: [Prof. Michael Beyeler](#)

- Developed **EyeTTS**, an open-source framework for evaluating and calibrating eye tracking during mixed-reality locomotion, resulting in first-author publications at IEEE ISMAR Adjunct and IEEE VR Workshops.
- Designed experimental protocols and software pipelines to quantify gaze-tracking drift during active user motion.
- Curated a multi-device eye-tracking dataset and conducted user studies across diverse locomotion layouts.
- Published first-author poster papers at IEEE VR and IEEE ISMAR Adjunct venues.

**Autonomous Ground Vehicle & Swarm Robotics Group, IIT Kharagpur**

Jan 2016 – Dec 2018

*Undergraduate Researcher*

- Contributed to the development of **Eklavya 6.0**, the IIT Kharagpur autonomous ground vehicle that finished **Runner-Up** at the **Intelligent Ground Vehicle Competition (IGVC) 2018**. [Competition Video](#) · [Team AGV](#)
- Developed a hardware-agnostic navigation stack integrating EKF-based localization from LiDAR, IMU, and GPS streams.
- Implemented visual obstacle segmentation using a custom U-Net architecture and hybrid motion planning using A\*/Dijkstra and Dynamic Window Approach.
- Designed decentralized multi-agent coordination using relative-pose estimation over an ad-hoc mesh network.

## Publications

---

### Peer-Reviewed Conference Papers

**SmartWatch for Wall Writing: Real-time Transcription of Wall Writing from Inertial Sensing**

Snigdha Das, **Satyam Awasthi**, Abdul Shannar P, Pradipta De, Sandip Chakraborty, and Bivas Mitra.

*COMSNETS*, 2022. DOI: [10.1109/COMSNETS53615.2022.9668531](https://doi.org/10.1109/COMSNETS53615.2022.9668531)

### Workshop & Poster Publications

**Eye Tracking Performance in Mobile Mixed Reality**

**Satyam Awasthi**, Vivian Ross, Sydney Lim, Michael Beyeler, and Tobias Höllerer.

*IEEE VRW*, 2024. DOI: [10.1109/VRW62533.2024.00321](https://doi.org/10.1109/VRW62533.2024.00321)

## EyeTTS: Evaluating and Calibrating Eye Tracking for Mixed-Reality Locomotion

Satyam Awasthi, Vivian Ross, Michael Beyeler, and Tobias Höllerer.

ISMAR Adjunct, 2023. DOI: [10.1109/ISMAR-Adjunct60411.2023.00104](https://doi.org/10.1109/ISMAR-Adjunct60411.2023.00104)

## Research Artifacts

---

### EyeTTS Calibration Framework

2022–2024

[Calibration Framework](#) · [User Study Framework](#)

- Developed an extensible framework for evaluating and calibrating eye-tracking systems during mixed-reality locomotion.
- Implemented device-agnostic benchmarking pipelines and automated drift-correction procedures.
- Released reproducible software infrastructure supporting eye-tracking research.

### EyeTTS Mixed-Reality Eye Tracking Dataset

2022–2024

[Dataset](#) · [User Study Videos](#)

- Curated a multi-device mixed-reality locomotion dataset for calibration and performance evaluation.
- Collected gaze trajectories, calibration measurements, and locomotion metadata across diverse MR layouts.
- Supported experimental validation reported in ISMAR and VRW publications.

## Selected Projects

---

### JitterNot

Jan 2022 – Mar 2022

*Learning-Based Model Predictive Control for Adaptive Video Streaming (UCSB)*

- Developed an LSTM-based predictor for network throughput enabling closed-loop control under non-stationary dynamics.
- Designed a model predictive control (MPC) framework using receding horizon optimization for adaptive decision-making over bandwidth constraints.

### IGVC Lane Detection & Navigation

June 2018

*ROS-Based Lane Perception Pipeline for Autonomous Ground Vehicles (IIT Kharagpur)*

- Developed a ROS-integrated lane perception pipeline using OpenCV, bird's-eye-view projection, CUDA/GPU-accelerated SLIC-style superpixel segmentation, and parabolic lane fitting for real-time autonomous navigation.
- Rejected obstacle and non-lane regions using contour-based ROI extraction, HOG descriptors, and SVM classification, then published local waypoint goals and segmented top-view lane masks for ROS navigation.

### In Motion — HAR using DeepConvLSTM

Nov 2019

*Embedded Sensor Inference System for Temporal Activity Recognition (IIT Kharagpur)*

- Designed a streaming inference pipeline for high-frequency IMU signals enabling real-time temporal classification.
- Implemented a DeepConvLSTM architecture combining convolutional feature extraction with temporal sequence modeling for activity recognition.

### Battleship Solitaire Solver

Apr 2022 – Jun 2022

*Solver-Aided Constraint Synthesis for Structured Search Problems (UCSB)*

- Formulated Battleship Solitaire as a symbolic constraint-satisfaction problem in Rosette/Racket, encoding grid cells, ship placements, row/column tallies, adjacency rules, and revealed-cell constraints.
- Used Rosette's solver-aided execution to synthesize valid board configurations satisfying all puzzle constraints.

## Industry Experience

---

### Intuit Inc

Mountain View, CA · Mar 2024 – Jan 2026

*Software Engineer 2*

- Built **dual-stage agentic decision pipelines** using tool-schema routing for real-time intent classification and sequential state tracking.
- Developed a decoupled **generative UI engine** leveraging RAG and structured LLMs to optimize deterministic component layouts.

### Yahoo Inc

Mountain View, CA · Apr 2023 – Nov 2023

*Software Dev Engineer II (IC3)*

- Developed **client-side rule engines** for asynchronous receipt payloads, executing deterministic filtering for **real-time decision support**.

## Coupang Global LLC

Mountain View, CA · Jun 2022 – Sep 2022

*Software Engineering Intern*

- Engineered **context-aware heuristics** to prune multi-dimensional search spaces based on active user state vectors.
- Designed **Content-Based Filtering (CBF)** layers using **cosine similarity** to rank high-dimensional product features.

## Samsung Research Institute

Noida, India · Sep 2020 – Sep 2021

*Software Engineer (CL 2)*

- Architected a **continuous on-device perception pipeline** ingesting multi-modal media streams for automated ML classification.
- Designed a **cross-profile data brokering engine** leveraging multi-user storage isolation to route assets from **User 1** to sandboxed **User 0**.

## Teaching

---

### University of California, Santa Barbara

Santa Barbara, CA

*Graduate Teaching Assistant*

Sep 2021 – Jun 2023

- Directed instructional labs, formulated algorithmic programming assignments, and monitored system architecture milestones for senior capstone teams.
- Covered advanced and core tracks: CS189 (Capstone), CS184 (Android), CS24 (C++ Data Structures), and CS16 (Problem Solving).

## Technical Skills

---

**Programming:** Python, C++, Java, Kotlin, MATLAB

**Robotics & Simulation:** ROS/ROS2, Gazebo, RViz, Unity

**Machine Learning & Vision:** PyTorch, OpenCV, CUDA/GPU Acceleration

**Methods:** State Estimation (EKF), Model Predictive Control (MPC), Motion Planning, Sensor Fusion, Spatial Perception

**Developer Tools:** Git

## Academic Service & Peer Review

---

### Peer Reviewer, UIST 2024

*ACM Symposium on User Interface Software and Technology*

- Reviewed submissions on interactive systems, spatial tracking, and interface hardware.

**INDIAN INSTITUTE OF TECHNOLOGY KHARAGPUR**  
**STATEMENT OF GRADES OBTAINED FOR THE 8 SEMESTER COURSE IN ENGINEERING/TECHNOLOGY LEADING TO THE AWARD OF**  
**BACHELOR OF TECHNOLOGY (HONOURS)**

## TRANSCRIPT GUIDE

### UNITS OF CREDIT:

Until September 1966, credits were recorded as semester units. Since that time, the University of California, Santa Barbara has operated on a quarter calendar, with three quarters per academic year and an optional summer session. Each quarter has ten weeks of instruction at the rate of one unit for every three hours of student work required each week.

### CURRENT GRADING SYSTEM:

The grades A, B, C, and D may be modified by plus (+) or minus (-) suffixes. Grade points for each unit are assigned as follows:

|          |         |          |
|----------|---------|----------|
| A+ = 4.0 | A = 4.0 | A- = 3.7 |
| B+ = 3.3 | B = 3.0 | B- = 2.7 |
| C+ = 2.3 | C = 2.0 | C- = 1.7 |
| D+ = 1.3 | D = 1.0 | D- = 0.7 |

Grades of F, I, IP, P, NP, S, U and W = 0.0 grade points

Unit credit, but not grade-point credit, is assigned for P and S grades.

|                                                                          |                           |
|--------------------------------------------------------------------------|---------------------------|
| P = Passed (C or better)                                                 | Undergraduate Course Only |
| NP = Not Passed (C- or below)                                            | Undergraduate Course Only |
| S = Satisfactory (B or better)                                           | Graduate Course Only      |
| U = Unsatisfactory (B- or below)                                         | Graduate Course Only      |
| I = Incomplete                                                           |                           |
| W = Withdrawal after established deadline                                |                           |
| IP = Grade to be assigned at the end of the final course in the sequence |                           |

### GOOD ACADEMIC STANDING:

A student is in good standing academically unless otherwise indicated.

### TRANSFER CREDIT:

Only credit that is accepted by the University is shown on the transcripts of UCSB students. Credit from other UC campuses may be shown either by individual course records or as a unit summary by campus. Individual courses from schools outside of the UC system are not shown.

### ADVANCED PLACEMENT CREDIT:

Examinations and the credits accepted for them are shown on the transcript in the same format and location as transfer credit.

### COURSE NUMBERING SYSTEM:

|             |                                         |
|-------------|-----------------------------------------|
| 1 - 99      | Lower Division Courses                  |
| 100 - 199   | Upper Division Courses                  |
| 200 - 299   | Graduate Courses                        |
| 300 - 399   | Professional courses for teachers       |
| 400 & above | Other professional and graduate courses |

### REPEATED COURSES:

An undergraduate student may repeat only those courses for which an NP or letter grade of C- or lower is recorded. If the grade from a previous attempt had been included in the GPA calculations, its effect is then removed by a "repeat adjustment" up to a maximum of 16 units over the student's career.

### ACCREDITATION:

Western Association of Schools and Colleges (WASC)
